

STERI-SYSTEM LINEAR SLOT DIFFUSER
STAINLESS STEEL
MODEL: 92LS-SS (16 FT. (4877) MODULE)

DESCRIPTION:

The Model 92LS-SS Steri-System Linear Slot Diffuser is specially designed to provide an air curtain for operating rooms. The unique slot design creates a continuous curtain of air, angled outwards 5 – 15 degrees, that encloses the operating area and minimizes the possibility of contaminated air entering the surgical area. The plenum is fully welded and the corners are radiused along the length to facilitate cleaning.

CONSTRUCTION:

1. 304 Stainless Steel face, pressure plate and distribution plenum. Minimum 24 ga.
2. Fully welded plenum construction.
3. Standard safety cables prevent accidental dropping of the removable face.
4. All face panels attached with stainless steel 1/4 turn fasteners.
5. Standard finish is #4 satin polished finish.

OPTIONS:

- Inlet Balancing Damper (Face Operated).
- 316 316 Stainless Steel construction.
